## Summary

I'm a Front-End Developer working in the languages and frameworks of HTML5, CSS3, JavaScript, JQuery, writing SQL queries, Ruby on Rails, Node.js, and React, as well I've built some really cool apps. I like clean code and UI/UX, and strive to make my work efficient and dynamic.

## Technical Skills

HTML5, CSS3, JavaScript, JQuery, Ruby on Rails, Node.js, React, MongoDB, Express, git, GitHub, SQL, PostGreSQL, SPA, Authentication, API, Trello and the Agile method.

## Projects

**Whack a Wonk**- A two player game that gives you the chance to whack the wonks. Whack correctly and earn points, incorrectly and lose points. A winner will be declared after both players play. This game was built using HTML5, CSS3, JavaScript, and JQuery.

**Eventbook**- An event memory keeper for to store all the details of that awesome event and all the great people you shared it with. Keep pictures, lists, stories, friends, and comments about it. This application was built using Ruby on Rails, MVC, PostGreSQL and styled with Bootstrap.

**The Drop**- "Surf spots at a pin drop." Quick access to surf report information like location, weather, tide report and water temperature. Built with React, JSON, AXIOS, Node and MongoDB. I contributed on this team effort as the Project Manager, design UX, and the Facebook Outside Authorization API.

**Workout Buddy**- Workout Buddy is your go to weight room workout logger. Record your exercises, sets, the number of reps and weight performed each and every time. I built this application using HTML5, CSS3, JavaScript, Node.js, React, Bootstrap and MongoDB.
